

Scribe this week: Owen

User stories updated: yes. Tags feature will be implemented by the due date or we will remove the feature, for now it is still being worked on.

Link to release notes 1-4:

<https://github.com/MichaelLaguatan/Recitation-14-Team-01-Spotlight/releases>

Link to project presentation slides:

Meeting notes: TA and Team meeting notes will be fully updated by 6:00 today :)

Functional Features:

Login and create an account with username and password. Verifies correct with data base and "securely" stores password. User can change username and password and account data will not be compromised. On home page user can search videos, and get results from youtube and vimeo APIs. User can click "view" on a video to save it to their account, and view it in full screen. TODO (optional): tags feature coming soon. If it is not done by Wednesday will likely be removed from website.

Active branches not merged to main:

BugFixTest. Not merged because branch was created to test ways to resolve bugs, now that the bugs are resolved in main there is no need to merge to main.

BrowseTagsOnWelcomePage. Not merged because (optional) feature is not complete yet. If this gets complete before the deadline it will be merged to main.

Name	Number of commits and what done for the week.
Owen	0. No need, is spending week on project presentation, organizing team meeting and sending TA meeting for week.
Harrison	4. Fixed many important bugs involving user login and welcome page render.
Michael	1. General bug fixes, also project write up and refining details of project.
Gabe	2. Fixing issues enabling tags feature to be implemented, has been generally working on tags feature

Vincent	0. No need, is spending week helping others to understand database structure and bug fixes.
