Meeting number: 3
Date and time: 4/25/23, 10:45
Minutes of meeting: 1 hour
Scribe: Owen Kutzscher

Commit to show off: Searching an entry on the website home page brings up video results from vimeo and youtube.

Plan for next week:
NOTE: All group assignments are based on how much work each person has done in past weeks. (In past weeks there were only so many tasks that could be completed, so some group members just didn't have that much to do.)
Michael - Project report, also finishing saved videos page + user to saved videos database integration (some mild bugs at the moment).
Harrison - Project report, (optional) "about us" page, also CSS and making sure all requirements met in all submissions.
Gabe - Tags feature and add tags to videos. Home page displays videos based on certain tags.
Owen - Testing (similar to lab 11)
Vincent - Release notes next week, group videos, bug fixes on search queries and database implementation, also CSS.

Finishing profile page. Other group members - make sure the project is functional and all requirements met.

We need to book a time to have our project presentation. Gabe has a flight to catch so ideally a presentation time May 14-16.

| NAME | COMMITS |
|------|---------|
| Owen | Added details page, when you click the "view" button redirects you to a full screen page to view your selected video |
| | Updated details page so now works smoothly with new website CSS formatting |
| | Home page saves last search, navigating back renders home page with last search |
| | CSS search bar colors improved |
| Vincent | queryByTags implemented |
| | allTags implemented |

| | |
|---|---|
| | updated Updated addVideos and the database for Harrison to account for platform |
| | Updated addTags to be able to tag a video with an existing tag and bug fixed addVideos |
| Gabe | Created an authentication that will redirect you to the login page if you try to access certain pages while not logged in |
| | Code was changed before previous authentication code was finished so login authentication was changed to match with the newly written code |
| | Resolved several conflicts with pull requests |
| | Created a tags page that opens up when you open the default/welcome page, not merged into main branch because not working |
| Michael | Created a PastVideos page that displays past viewed videos |
| | Changed AddVideos function to link watched videos to user and to stop duplicate videos |
| | Changed display aesthetic of cards/css |
| | Details page displays correctly independent of originating from videos table or results page |
| Harrison | Added loading animation on search |
| | Made new menu page |
| | Complete CSS overhaul & fixed visual bug in results page |
| | Added new menu bar aesthetic |
